AMOS JOSIAH OLUWATOSIN

AI Evaluation & Testing Contributor | Data Analysis | Technical Writer

josiahamos109@gmail.com | +1 (334) 935-5559 | St Catherines, Ontario, Canada

PROFESSIONAL SUMMARY

Detail-oriented evaluator with a strong foundation in critical reading, research, and structured analysis, applied to assessing AI-generated text and digital products. Comfortable working independently against detailed guidelines and scoring rubrics, comparing model outputs for accuracy, coherence, and safety, and documenting findings in clear, well-organized written feedback. Reliable, deadline-conscious, and quick to learn new evaluation platforms and task-specific instructions.

CORE SKILLS

- Evaluating AI-generated responses for accuracy, relevance, tone, and completeness
- Identifying hallucinations, factual errors, and logical inconsistencies in model outputs
- Applying structured guidelines, style guides, and multi-point scoring rubrics consistently
- Writing clear, specific, and actionable feedback and rationale for ratings
- Comparative analysis of multiple AI responses to determine relative quality
- Attention to detail, pattern recognition, and unbiased, objective judgment
- Basic prompt review and identification of prompt/response misalignment

RELEVANT EXPERIENCE

AI Generalist Trainer/Expert | *Quantum Solutions LLC, 2024 – Present*

- Reviewed AI-generated responses against detailed task guidelines, flagging hallucinations, unsupported claims, and reasoning errors
- Scored outputs using multi-criteria rubrics covering helpfulness, accuracy, safety, and formatting
- Provided written explanations for each rating to support model training and quality review
- Completed structured tasks within set turnaround times while maintaining consistent quality standards

Digital Product & Interface Testing Specialist | *Silver Lake Enterprises, 2023 – 2024*

- Tested websites, applications, and prototypes for usability issues, bugs, and inconsistent behavior
- Documented reproducible steps, expected vs. actual results, and severity of each issue
- Communicated findings clearly to non-technical and technical stakeholders alike

Artificial Intelligence Director & Lead Writer| *C3 AI, 2021 – 2023*

- Applied machine learning framework like Keras and Tensor Flow across project
- Engineered AI models and algorithms to address complex business challenges using Python, R, and Java

TOOLS & ENVIRONMENT

- Google Workspace (Docs, Sheets, Forms) and Microsoft Office (Word, Excel)
- Browser-based annotation, labeling, and evaluation platforms
- Slack and email for asynchronous communication with distributed teams
- Reliable broadband connection, personal laptop, and quiet remote workspace

TECHNICAL COMFORT

- Comfortable navigating web-based task queues, dashboards, and guideline documents
- Able to follow evolving instructions and apply feedback from calibration or quality reviews
- Basic understanding of how large language models generate and can misrepresent information
- Quick to adapt to new tools, rubrics, and platform-specific workflows

AVAILABILITY

- Available for remote, part-time or full-time freelance work
- Flexible schedule; able to accommodate overlapping time zones for team check-ins
- Open to short-term project work, ongoing task-based contracts, and evaluation pilots

EDUCATION

- **College:** University of Western Ontario, Canada **Course:** English & Literary Studies
